ABSTRACT

This case study examines the implementation of management principles and organizational activities at Apotek K-24, one of Indonesia's most prominent apotek networks. As the agricultural industry continues to grow, K-24 has challenges in reducing human fatigue and increasing operational efficiency. This study examines how K-24 applies management principles such as strategic planning, organizational structure, leadership, and innovation to achieve its business objectives. In addition, the activities of the K-24 organization are also examined, including organizational culture, employee motivation, and team dynamics. Through a qualitative approach, data is collected through interviews with managers and employees as well as silent observation at a few apotek locations. The study's findings indicate that effective management principles and understanding of organizational operations contribute to the improvement of employee productivity and satisfaction in K-24. This provides useful information for practice and customer satisfaction in Apotek K-34. This provides useful information for practitioners and academics in understanding the relationship between management and organizational activities in the context of the farming industry.

CHAPTER 1

THE INTRODUCTION

CONTRIBUTE

One of Indonesia's top drugstore chains, Apotek K-24, is well-known for its round-the-clock operation. As a neighborhood drugstore, K-24 concentrates on offering medications and medical services that the general public may readily obtain, whether in large cities and more rural locations. This pharmacy, which goes by the tagline "Apotek K-24, Apotek Keluarga," is dedicated to giving Indonesian families the finest possible service by providing high-quality pharmaceutical products, including prescription medications and other health supplies. In the corporate world, Apotek K-24 works in the very competitive retail pharmaceutical market, where new competitors are constantly joining the market. Therefore, Apotek K-24 prioritizes the factors of service quality and product reliability in an effort to sustain its continuity and growth. Using social media as the primary marketing channel is one of the digital strategies that Apotek K-24 has put in place as part of its endeavor to modernize and grow. The goals of Apotek K-24's social media marketing initiatives are to improve consumer engagement, broaden their audience, and provide health education in a more effective and efficient manner.

Apotek K-24 places a high priority on a management approach that emphasizes on service quality and empowering human resources. From pharmacy employees who deal directly with customers to managers who oversee branch operations, the management of this pharmacy understands that strong team performance is crucial to corporate success. Therefore, Apotek K-24 prioritizes skill development for staff members through ongoing training and the implementation of an incentive program that encourages staff to deliver the highest quality of service. Furthermore, the business stresses the value of keeping positive relationships with clients in order to make them feel content and devoted to the goods and services offered. However, Apotek K-24 faces certain organizational behavior-related issues as a result of its rapid business development. Consistency in service across all branches located in different regions is one of them. Market conditions vary every branch, and service quality may be impacted by staff with varying backgrounds and work cultures. As a result, management needs to be able to effectively handle these variations and guarantee that every employee is aware of the company's values and service standards. Establishing efficient communication and regularly training staff members at all levels take a lot of work.

Additionally, controlling staff stress and workload is linked to organizational behavior management difficulties, particularly during peak hours and times when there is a spike in customers, such as during a promotional campaign. Workers frequently have to maintain client satisfaction while working under time pressure. As a result, management needs to make sure that workers have enough facilities and support in terms of managing their working hours and workload. Apotek K-24 also has to figure out how to keep up with technical advancements, particularly when it comes to digital marketing. Even if social media offers a fantastic chance to launch new products and raise brand awareness, it can be challenging to manage several platforms and make sure the message is understood by audiences with various traits. It takes imagination to use social media to provide interesting, timely, and instructive information. The quick shift in customer behavior, which includes a growing need for convenience in transactions, especially online drug purchases, is another difficulty.

To enhance the customer experience, Apotek K-24's management must be able to innovate by consistently leveraging digital technology. Thus, it is crucial that the business create a system that facilitates order placement for clients via a website or mobile application and enhances customer support via a variety of digital platforms. Thus, while facing significant internal and external management obstacles, Apotek K-24 is able to hold onto its position in a market that is becoming more and more competitive.

CHAPTER 2

KEY ELEMENTS OF THE CASE

A. The Main Business Challenges

1. Provisions that must be adhered to

Drug corporations are required to comply with many regulations, including criteria for the manufacture and delivery of drugs as well as clinical trial requirements. Failure to comply with regulations can result in expensive penalties, and can also cause damage to the good name of the corporation.

2. Breakthrough

Pharmaceutical corporations must make breakthroughs with the development of technology which is always changing the landscape. For companies that want to remain competitive, it is important to continue making breakthroughs to meet the needs of patients.

3. Price Compression

Drug prices must be controlled, resulting in high pressure on drug corporations, both from the public and government regulators. As a result, the profit margin decreases and competition increases, making it difficult for corporations to produce new goods and difficult to invest in R&D.

B. The Management Principles Applied

1. Staff Involvement

Engage employees at all levels of your business to develop and implement procedures and mechanisms that generate positive results, ultimately enhancing your business performance.

2. Focus on Consumers

Consumers are central to all transactions. Meeting customer needs is essential for the company's growth and success.

3. Leadership

Strong leaders who maintain a firm stance foster excellent quality and create harmony within the organization.

4. Strategic Implementation of Procedures

Applying a well-defined strategy to all business procedures will enhance product effectiveness and motivate overall performance.

5. Continual Improvement

Establish processes to identify risks and opportunities, measure your efforts, and address issues to enhance business performance, foster growth, improve customer satisfaction, and effectively respond to challenges.

6. Evidence-based approach to decision making

Make informed decisions based on accurate and reliable data, ensuring that relevant information is accessible and communication is open, as this evidence-based approach enhances performance assessment, operational efficiency, and supports initiatives that align with your company's goals.

7. Relationship management

Involves building and nurturing robust connections with clients and suppliers, which is essential for improving business performance.

C. The Organizational Behavior Aspects Involved

In an increasingly competitive business world, organizational behavior plays an important role in determining the success of a company. At Apotek K-34, aspects of organizational behavior not only include interactions between employees and management, but also how the culture. Here are the aspects of organizational behavior involved in Apotek K-34:

1. Team Commitment:

Team commitment is the level of dedication and attachment of team members to the goals and values of the organization. It includes the desire to work together and actively contribute to achieving a shared vision. All staff of Apotek K-34 have a high commitment to the vision and mission of the pharmacy, which contributes to 24-hour service and customer satisfaction.

2. Inspirational Leadership:

Inspirational leadership is a leadership style that motivates and inspires team members to achieve their best potential. Inspirational leaders are able to create a clear vision and inspire enthusiasm in the team. Dr. Gideon Hartono demonstrates leadership that motivates and inspires his team to remain humble and focused on common goals.

3. Cooperation and Collaboration:

Cooperation and collaboration is a process in which individuals or groups work together to achieve a common goal. It involves effective communication, mutual respect, and sharing of responsibilities. Apotek K-34 has a culture of cooperation among employees, which encourages collaboration in achieving organizational goals.

4. Diversity Values:

Diversity values refer to the recognition and appreciation of individual differences in terms of ethnicity, religion, gender, and other backgrounds. Organizations that value diversity create an inclusive and respectful environment. Apotek K-34 prioritizes the value of harmony in diversity, creating an inclusive and respectful work environment.

5. Adaptation to Challenges:

Adaptation to challenges is the ability of an individual or organization to adjust to change and overcome difficulties. This includes flexibility, creativity, and resilience in the face of difficult situations. The ability to learn from difficulties and turn them into inspiration shows the flexibility and resilience of the organization.

6. Focus on Service:

Focus on service is the orientation of the organization to provide high-quality service to customers. This includes a deep understanding of customer needs and a quick response to their requests. Orientation to good customer service and responsiveness to community needs is a top priority.

7. Self-Development and Continuous Learning:

Self-development and continuous learning is a process in which individuals continuously improve their skills, knowledge, and competencies. This includes a commitment to lifelong learning and adapting to changes in the work environment. Dr. Gideon applies the concept of lifelong learning, both for himself and for employees, which supports professional and personal growth.

QUESTION FOR STUDENT

What are some metrics the store can use to measure the success of their social media marketing efforts?

In today's digital era, social media has become a popular platform for individuals and businesses to generate income. Many companies leverage social media to enhance their marketing strategies. One effective way to improve these strategies is by analyzing content data, known as social media metrics. These metrics are collections of data used to evaluate the social media performance of individuals or organizations. They help measure the quality of content about the general public.

Here are 10 important social media metrics:

1. Engagement Rate

The engagement rate assesses consumer participation. It can be measured by the number of likes, comments, and shares a post receives, not only from followers but also from external users. To calculate the engagement rate, sum the total likes, comments saves, and shares, then divide by the total number of followers.

The formula is:

$$\text{Engagement Rate} = \frac{\text{Total number of likes, comments, saves, and shares}}{\text{Total Followers}} \times 100$$

2. Conversion Rate

This metric measures how often someone clicks on a link in your post that leads to an action, such as a download or a sale. The conversion rate is typically tracked using UTM links in social posts or profiles. It is one of the most important metrics as it reflects the effectiveness of social media efforts.

The formula :

$$\text{Conversion Rate} = \frac{\text{Total conversions}}{\text{Total Click}} \times 100$$

3. Reach and Impressions

Impressions refer to the number of times your content is seen, regardless of engagement, while reach indicates the total number of unique users who see your posts. Reach can be lower than impressions, as one person may view your content multiple times.

4. Cost per Click (CPC)

This metric is used in paid social advertising and can be calculated by dividing the total ad budget by the total link clicks.

The formula :

$$\text{Cost per Click} = \frac{\text{Total ad budget}}{\text{Total click link}} \times 100$$

Effective campaigns should aim for more clicks at a lower cost per click.

5. Click-Through Rate (CTR)

This metric indicates how often users click the link in your post, helping you gauge whether your content is engaging enough. To calculate the CTR percentage, divide the total link clicks by the total impressions and then multiply by 100.

The formula :

$$\text{Click - Through Rate} = \frac{\text{Total conversions}}{\text{Total Click}} \times 100$$

6. Audience Growth Rate (AGR)

The audience growth rate shows how much your follower count has increased or decreased. You can check this by comparing your current social media report to a previous one. To calculate the AGR percentage, divide the number of new followers by the total number of followers and multiply by 100.

The formula :

$$\text{Audience Growth Rate} = \frac{\text{New followers}}{\text{Total followers}} \times 100$$

By understanding and utilizing these metrics, we can effectively enhance our social media presence and marketing strategies.

CONCLUSION

In today's digital era, many people leverage social media as a way to generate income. Additionally, numerous companies utilize social media to enhance their marketing strategies. One effective method for improving these strategies is to analyze the data from the content we create, known as social media metrics.

Social media metrics are a collection of data used to evaluate the performance of an individual or organization on social media platforms. These metrics help measure the quality of our content in relation to the general public. The goal of social media metrics is to improve, monitor, and describe overall marketing efforts.
